

# Exploring Intonation

Using a tuner, play each pitch on your instrument for eight full beats without any dynamics or vibrato. Do not try to adjust the pitch with your embouchure or alternate fingerings. Record the pitches onto the chart below using the following method:

-	1-10 cents flat	+	1-10 cents sharp
--	11-20 cents flat	++	11-20 cents sharp
---	21-30 cents flat	+++	21-30 cents sharp
----	31-40 cents flat	++++	31-40 cents sharp
-----	41-50 cents flat	+++++	41-50 cents sharp

If the note is in tune, then either draw a check or write "In Tune" in the blank. Use this sheet to evaluate your instruments tendencies with certain pitches. Practice with a tuner every day to work on training the ears to hear the proper pitches.

Pitch	Octave 1	Octave 2	Octave 3
